Project description and activities

With the project "YOUth Shaping Democratic Future" we aim to bring together 35 young participants from different EU countries to learn together, to collaborate, to develop as individuals in different fields and to generate quality ideas for the future of their peers and ultimately of society.

The main objective of the project is to promote active citizenship and participation of young people in democratic life and to raise awareness of the values of the European Union. It also aims to guide young people on their journey through non-formal education, to develop their social, cultural, linguistic and other lifelong learning competences, to help them make the transition from education to the labour market and to prepare them for the challenges ahead. In addition, the aim is also to create the basis for a strong partnership to prepare quality learning experiences for young people for the long term future. The project aims to empower young people, giving them the knowledge and tools to become more active EU citizens and to actively engage in EU decision-making processes.

We will have the entire place to ourselves. There are comfortable rooms with linens, a dining room, workshop room, a kitchen, a huge terrace, lots of space outside with a grill place.
